**REQUEST FOR SUBSEQUENT SUSPENSION UNDER C.F.R. §1.103(a) or (c)**

COMMISSIONER FOR PATENTS  
ALEXANDRIA, VIRGINIA 22313

SIR:

Applicants respectfully request that prosecution in the above-identified patent application be suspended for additional six months under 37 C.F.R. § 1.103(a) or alternatively for three months under 37 C.F.R. § 1.103(c).

As stated in the request for suspension filed April 4, 2006, the U.S. Naval Research Laboratory (NRL) has been conducting a cooperative research with Mitsubishi Heavy Industries, Ltd. since May 20, 2005 on the nuclide transmutation technique, and the cooperative research will be continued till May 2007 according to the schedule of the cooperative research. This schedule has not been changed.

Applicants believe that the cooperative research with NRL will produce experimental results in support of the operability of the present invention, and thus wish to submit such experimental results to the USPTO in the present application.

Furthermore, as stated in the previous request for suspension, Dr. Kitamura of Kobe University conducted a research on related technology and reported at 12<sup>th</sup> *International Conference on Condensed Matter Nuclear Science* held between November 27 and December 2, 2005. Applicants wish to submit information of this experiment, as they become available.

For the foregoing reasons, Applicants respectfully submit that there are good and sufficient reasons for the requested suspension and that the requirements for 37 C.F.R. § 1.103(a) are met.

If, however, the above cooperative research does not comprise “good and sufficient reasons” as required under 37 C.F.R. § 1.103(a), Applicants alternatively request a three month suspension under 37 C.F.R. § 1.103(c), as the processing fee required under §1.17(i) is attached herewith. The Commissioner is also authorized to withdraw any fee insufficient from the undersigned attorney’s account no. 15-0030.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
